Three level Quality
Check and Quality
Assurance approach

DISCOVERY

- Concept annotation and indexing
- Compound safety and toxicity report
- Compound-target-indication profiling
- SAR and chemical reactions data curation
- Customized scientific report on target/indic
- Amino acid profiling for therapeutic indication
- Markush enumeration & analysis

TRANSLATIONAL

- Actionable mutations for targeted therapy
- Gene & Biological process annotation-ontology mapping
- Clinical genome variant interpretation & reporting
- Phenotype reporting-outcome mapping
- Gene set enrichment analysis & pathway analysis
- Multi-omics data integration & analysis
- Off-label use of approved drugs
- Pre-Clinical PK/TK/PD

CLINICAL

- Clinical Outcomes
- Clinical PK/PD
